

DECT 70

The DECT70, is well positioned in price and functionality to supplement any system phone, or can be used as an analogue extension. An alphanumeric, inverse illuminated display and an intuitive menu makes using the phone simple. CLIP and CNIP support (calling name identification presentation out of the telephone book of the PABX), hands-free calling at the mobile unit and muting round up the wide range of convenience features available with this unit. The DECT70 makes use of a separate R key that permits easy use of the functions "inquiry call" and "Broker's call".
